EDUCATION

University of Maryland Baltimore County, Catonsville, MD

August 2025 - Current

BS in Information Systems

Relevant Coursework: Computational Thinking and Design, Introduction to Computer Programming, Computer Programming II, Management Information Systems

TECHNICAL SKILLS & CERTIFICATIONS

Skills: Data Analysis, Generative AI, Prompt Engineering, AI Model Evaluation, Systems Analysis, Object-Oriented Programming (OOP), Database Management, Version Control, API Development, Full-Stack Development

Certifications: Career Essentials in Generative AI by Microsoft and LinkedIn, IBM Artificial Intelligence Fundamentals, Google Data Analytics Professional Certificate, Oracle Cloud Infrastructure 2025 Certified Foundations Associate

Languages: Java, Python, SQL, JavaScript, HTML, CSS

Tools: Microsoft Excel, Google Sheets, Power BI, Oracle Cloud Infrastructure (OCI), GitHub, FastAPI, SQLite, Render,

PROFESSIONAL EXPERIENCE

Handshake, AI Data Trainer Fellow

November 2025 - Current

- Evaluated and ranked AI-generated responses across multiple tasks to improve output quality and model reliability.
- Reviewed multimodal content including text, images, and videos to assess model performance.
- Applied quality standards and feedback frameworks to support AI training initiatives.
- Consistently met quality expectations while managing deliverables in a remote environment.

PROJECTS

Nexus AI | JavaScript, Python, FastAPI, SQLite

- Built and deployed a **full-stack student career operating system** that tracks applications, certifications, projects, skills, networking, interviews, resume notes, and goals in one workspace.
- Developed a **FastAPI + SQLite backend** with workspace import/export, CRUD endpoints, readiness analytics, and production CORS configuration for a GitHub Pages frontend.
- Designed **onboarding, recruiter sample data, resume scoring, skill-gap analysis, weekly action planning, and a product case study view** to make the app usable as a portfolio product.

LearnWise AI | HTML, CSS, JavaScript

- Built a custom **JavaScript recommendation engine** that scores and ranks lectures, readings, tutoring, office hours, practice problems, quizzes, and other resources by urgency, topic relevance, subject fit, access type, and expected impact.
- Designed an academic **ROI scoring model** to estimate resource value per study hour and project expected grade improvement.
- Created an interactive dashboard that displays **ranked recommendations**, course risk level, projected grade impact, resource effectiveness, and a focused study plan.

15 Weeks At UMBC | Java, Processing, JavaScript

- Built a choice-driven university life simulation game in **Java/Processing** and converted it into a **JavaScript browser version**, modeling 15 weeks of student decisions and consequences.
- Implemented a dynamic state-management system tracking **academic standing, finances, health, and entertainment** across gameplay.
- Programmed conditional game-over logic where player choices directly affected resource depletion and final outcomes.

LEADERSHIP & INVOLVEMENT

Color Stack, Member

June 2026 - Current

- Active member of a national tech community supporting Black and Latinx students through career development, mentorship, and professional networking.
- Engages with internship resources, technical learning opportunities, and peer support to strengthen career readiness in technology.
- Contributes to a community focused on expanding access, representation, and belonging in the tech industry.
