EDUCATION

University of Maryland Baltimore County, Catonsville, MD

August 2025 - Current

BS in Information Systems

Relevant Coursework: Computational Thinking and Design, Introduction to Computer Programming, Computer Programming II, Management Information Systems

TECHNICAL SKILLS & CERTIFICATIONS

Certifications: IBM Artificial Intelligence Fundamentals, Google Data Analytics Professional Certificate, Oracle Cloud Infrastructure 2025 Certified Foundations Associate

Languages: Java, Python, SQL, JavaScript, HTML, CSS, C++

Frameworks & Tools: FastAPI, SQLite, GitHub, Render, Power BI, Oracle Cloud Infrastructure (OCI), Docker, PostgreSQL, React, TypeScript

PROFESSIONAL EXPERIENCE

Handshake, AI Data Trainer Fellow

November 2025 - Current

- Evaluated and ranked 1,000+ AI-generated outputs spanning text generation, code, creative writing, and multimodal (image/video) tasks, applying structured quality rubrics to identify factual errors, reasoning failures, and inconsistencies.
- Assessed model performance across varied task types and content formats, contributing evaluation data used to support AI training and reliability initiatives.
- Maintained consistent quality standards while independently managing deliverables in a remote environment.

PROJECTS

[Nexus AI](#) | JavaScript, Python, FastAPI, SQLite

- Built and deployed a full-stack career operating system, used by **beta users** to track applications, certifications, projects, skills, networking, interviews, resume notes, and goals in one workspace.
- Developed a **FastAPI** + **SQLite** backend with data management endpoints, workspace import/export, readiness analytics, and secure frontend-backend integration for a GitHub Pages-hosted app.
- Designed onboarding, recruiter sample data, resume scoring, skill-gap analysis, weekly action planning, and a product case study view to make the app usable as a portfolio product.

[LearnWise](#) | HTML, CSS, JavaScript

- Built a custom **JavaScript** recommendation engine that scores and ranks resources — lectures, readings, tutoring, office hours, practice problems, and quizzes — by urgency, topic relevance, and expected impact, used by **beta users** to plan their study time.
- Designed an **academic ROI scoring model** estimating resource value per study hour and projecting expected grade improvement.
- Built an interactive dashboard surfacing ranked recommendations, **course risk level**, projected grade impact, and a focused weekly study plan.

[15 Weeks At UMBC](#) | Java, Processing, JavaScript

- Built a choice-driven university life simulation game in **Java/Processing** and converted it into a **JavaScript** browser version, played by **beta users** testing 6 student paths across 15 weeks of decisions and consequences.
- Implemented a dynamic state-management system tracking **7 stats** — academic standing, finances, health, and more — across gameplay.
- Programmed conditional game-over logic with **multiple possible endings**, where player choices directly affected resource depletion and final outcomes.

LEADERSHIP & INVOLVEMENT

Adobe, Student Ambassador

July 2026 - Current

- Selected to represent Adobe at UMBC and promote Adobe technologies through campus engagement and community initiatives.
- Collaborate with Adobe staff and fellow ambassadors while connecting students with Adobe products, events, and educational resources.
- Participate in Adobe's Community Program, completing training modules and engaging in community activities to build deeper product fluency across Adobe's Creative Cloud and AI tools.

Color Stack, Community Member

June 2026 - Current

- Active member of a national tech community supporting Black and Latinx students through career development, mentorship, and professional networking.
- Engage with internship resources, technical workshops, and peer discussions to strengthen career readiness and stay current on opportunities in the tech industry.
- Contributes to a community focused on expanding access, representation, and belonging in the tech industry.
